

Procedure 1.01  
**Quality Policy**

Sagiv is a leading manufacturer and designer of ball and special valves, fittings and OEM products. Sagiv's products incorporate the company's hot forging and advanced machining technologies. The products are well established in Building, HVAC, Agriculture and industrial flow control systems for water, gas, petrol and oil applications.

Sagiv's products comply with Israeli standards SII 1144, 637, 1607 and adhere to military specifications and requirements.

The company, as a policy, supplies its customers with high quality products. We strive for constant improvement, and keep an open channel with our customers towards this end. We view our customers as partners and ceaselessly try to improve on engineering designs, quality and price for their benefit.

Sagiv works closely with the community on common projects.

We implement the ISO9001:2000 quality management system and comply with international quality standards, such as UL and CSA.

The company sets specific goals and constantly measures its achievements against them in order to improve performance and effectiveness of its system.

Sagiv is committed to safety and health of its employees.

Sagiv's management and employees are jointly responsible for the full implementation of this policy.
